General Summary of Duties: AES is looking for individuals to work mostly Fridays and Saturdays from 10:00am until midnight installing temporary networks in local hotels and other venues to support computerized auction fundraising for our clients. Candidates must be at least 22 years old, have a valid state driver's license and have reliable transportation. Technical Supervisors will be installing, and supervising the installation of Ethernet, power cables, switches and access points as well as Windows based tablet PC's during the day; and then monitoring the environment in the evening and finally tearing down that same infrastructure that night. Candidates should be in good physical condition and be able to lift up to 40 pounds. Ideal candidates must be good with the customer relations and have a firm understanding of wired and wireless computer networking.

Job Qualification

Successful candidates will must at least have a high school or equivalent education, trade school or college is preferred. Candidates must be polite and people friendly and will be required to work closely with executive level clients. Project management and supervisory skills a plus. AES will provide paid training to successful candidates.
